

Online Resources

Electronic resources or **e-resources** are materials in digital format accessible electronically. Examples of e-resources are electronic journals **e-journal**, electronic books **e-book** and online databases in varied digital formats such as Adobe Acrobat documents, pdf, and Web Pages, html.

E-resources can also include articles from newspapers, dictionaries or encyclopaedias as well as images, and many other items.

The library purchases and subscribes to many items in electronic or e-format so that you can have access free of charge anywhere you have an internet connection. If you would like to check out some of our e-resources, you can find e-books in our catalogue directly from the LRC's homepage or in several databases holdings which can be accessed at .

E-resources helpful to ensure exhaustive and pinpointed information. The e-resources provide themselves various search options to the user and library manages. Using of e-resources enable the library to save space of library and time of the users.

Access of material any time, any where Easy to use Additional e-journals link facility. Fast and quick access of desired information. Access of material with multimedia Video, animation, sound, graphical form etc. Time saving Cheaper than print materials.

The electronic resources are effective outcome of efforts of information technologies to overcome the problem of this controlling and manipulating which includes information acquisition acquisition, storage, retrieval and preservation. E resources have great potential and bright f

Need of E-Resources

- *To search and reach to information quick we want This is hard to do with printed materials.
- * To make rapid and effortless search of information. We could not do rapid search when printed e- resource is not available in library .
- * To save time and money of both library servants and user. There is no need of help of staff every time and user can get direct access of information through computer or internet
- * To carry out or transfer data easily.
- * To make available in more quan
- * To make better preservation of information collection,

- * To make use for more user at a time.
- * To acquire up-to-date information.
- * To browse huge amount of information to make deep study or research work.
- * To search information worldwide available.
- * Printed material is limited and exclusive.

A librarian from our institute goes to the classroom and conducts workshops in every class subscribed E-Recourses by the Library department .how to use it .students are trained on how to use the E-resources. It is demonstrated by the students.
